

OrthoMaster 6.1	1
Patch: Improved handling of “Areas of Interest”	1
Patch: Reorganization of the “Data” menu	1
Patch: Removing DTM definitions.....	1
Patch: Crash with file selection	1
Patch: Correct handling of GCP status	1
Patch: Minor bug fixes	1

Note that the version 6.1 of OrthoMaster does not require a new license.

OrthoMaster 6.1

A variety of enhancements is not module specific but is affecting the whole suite of modules. Therefore it is recommended to read through the ApplicationsMaster Release Notes in order to be completely informed on any important changes to your product.

Patch: Improved handling of “Areas of Interest”

For version 6.1 of OrthoMaster the handling of “Areas of Interest” was changed to cover more special cases of polygons, mainly those defining corridors.

Patch: Reorganization of the “Data” menu

The “Data menu” was slightly reordered to have more obvious menu entries.

Patch: Removing DTM definitions

When in EO Studio or in OrthoMaster a DTM file was removed, the entry was not deleted from the project file. The new release fixes this behavior.

Patch: Crash with file selection

Fixes a stability issue when in some cases OrthoMaster crashed during cancelling file selection boxes.

Patch: Correct handling of GCP status

The patch fixes trouble with displaying and correctly transferring the GCP activation status between Inpho modules.

Patch: Minor bug fixes

In addition, some minor problems were solved. These are not listed in detail.
