

OrthoVista 7.0 – 7.0.1	1
Patch: Name Pattern editor for tiling	1
Patch: OrthoVista with extremely large projects	1

Note that the version 7.0 of Inpho does require a new license. Please check your maintenance status as everybody with active maintenance as of September 2015 will be entitled to update for free. Also note that the first year of maintenance is included in the software purchase price.

This document highlights the major changes to the software – minor changes and fixes are not described. Also be aware that basic functionality (relevant to all Inpho software modules!) is documented additionally in the release notes of the “ApplicationsMaster” module!

OrthoVista 7.0 – 7.0.1

Patch: Name Pattern editor for tiling

The patch solves problems with the index column within the pattern editor.

Patch: OrthoVista with extremely large projects

The patch fixes a problem with internal tile handling (loading/unloading) when working with extremely large projects.
