

Note that the version 7.0 of Inpho does require a new license. Please check your maintenance status as everybody with active maintenance as of September 2015 will be entitled to update for free. Also note that the first year of maintenance is included in the software purchase price.

This document highlights the major changes to the software – minor changes and fixes are not described. Also be aware that basic functionality (relevant to all Inpho software modules!) is documented additionally in the release notes of the “ApplicationsMaster” module!

For MATCH-T itself there are no new features for 7.0 – changes can be found in ApplicationsMaster.

Should you have any questions regarding the technical details of software, please contact your Support Team at imaging_support@trimble.com.
